

A STEEL CONSTRUCTION CHECKLIST

Objective: System Setup and Data Integration.

Phase	Item / Task	Description
1. Master Data Migration	Charts of Accounts	Uploading the list of all financial accounts (Assets, Liabilities, Income, Expenses etc.).
	Journals	Moving historical accounting records into the new system.
	Customers	Importing all clients contact details and profiles.
	Vendors	Importing all supplier and subcontractor information.
	Product Categories	Organizing items into groups and set up inventory groups.
	Products/Items	Importing the full list of construction materials and services.
2. Financial & Stock Templates	Opening Balances	Filling out the closing balances from the previous accounting period.
	Stock Balances	Recording the current quantity and value of items in the warehouse.
	Assets Template	Recording all company equipment, vehicles, and property with their current values.
3. Quality Control	Verification	Checking that all imported data matches the original source files.

	Validation	Confirming the system balances are correct before going live.
	Balance Reconciliation	Ensuring the "Total" in the new system matches the "Total" from the old records.
