

GREENWOOD SUPPLY SERVICES

Odoo 19 Implementation | iSERD Technology Solutions

PHASE 1 — DISCOVERY

Complete Step-by-Step BPM Execution Guide

Week 1 | Tuesday 3 March — Friday 6 March 2026

Sprint Goal: Complete BPM for all 13 modules and obtain client sign-off

How to use this guide: This document walks you through every single thing you need to do, ask, and document during Phase 1 — day by day, module by module. Follow it in order. Do not skip steps.

Boss has handled: The Inception Report is already being prepared by your senior. Your job in Phase 1 is to own and execute the BPM — share the Activity Plan with Greenwood, run the discovery sessions, document everything, and get sign-off.

PHASE 1 OVERVIEW

What Phase 1 Is About

Phase 1 is the most critical phase of the entire project. Before a single button is configured in Odoo, you must fully understand how Greenwood Supply Services currently runs its business — process by process, department by department. This is called Business Process Mapping (BPM).

The BPM is your blueprint. Every configuration decision in Phase 2 will be based entirely on what you document here. If you get this wrong or incomplete, the system you build will not match how Greenwood actually works — and that causes problems at Go Live.

Your Deliverables for Phase 1

- **BPM Activity Plan** — shared with Greenwood to align on dates and what departments will be covered each day
- **Documented BPM** — detailed process documentation for all 13 modules, covering current-state flows, proposed Odoo workflows, and any gaps between them
- **Master Data Templates** — sent to Greenwood with a clear deadline for return (Wed 11 March at latest)
- **Client Sign-Off** — written approval from Greenwood on the completed BPM document before Phase 2 begins

Note: You are NOT doing the Inception Report — your senior has that covered. Your focus is 100% on the BPM.

Phase 1 Timeline at a Glance

Day	Date	Focus
Tuesday	3 March 2026	Sprint planning, BPM prep, send master data templates, share BPM Activity Plan with Greenwood
Wednesday	4 March 2026	BPM Discovery — Inventory & Warehouse, Purchase, Sales
Thursday	5 March 2026	BPM Discovery — Accounting, HR (all HR modules), Expenses, Appraisal, Assets, Project, Document
Friday	6 March 2026	Finalise all BPM documentation, complete process diagrams, present to client, obtain sign-off

TUESDAY

3 March 2026

Sprint Planning | BPM Preparation | Alignment

Sprint Goal for Tuesday: Get organised, prepare all your BPM tools and question sheets, send the master data templates to Greenwood, and share the BPM Activity Plan so both sides are aligned on what is happening this week.

Step 1 — Sprint Planning (9:00 AM)

Start the day with a Sprint Planning session with your iSERD team. This sets up the sprint board and assigns responsibilities for the week.

What to do in Sprint Planning:

1. Open your sprint board (Jira, Trello, or whatever tool iSERD uses). Create a new sprint for Week 1 — label it 'Phase 1 Discovery — Week 1'
2. Write the Sprint Goal at the top: 'Complete and document BPM for all 13 modules, obtain client sign-off by Friday 6 March'
3. Create individual tasks for every BPM discovery session planned for Wednesday and Thursday — each session is its own task card
4. Assign each task to a team member. Make sure everyone knows exactly what they are responsible for documenting
5. Set priority order: core business flow modules first — Inventory, Purchase, Sales, Accounting, HR, then the rest
6. Confirm: who is the note-taker for each session? Who leads the session? Who is documenting the BPM write-up after?

Step 2 — Prepare BPM Discovery Templates

You need question sheets for every module before the sessions start. These are your conversation guides. Go into each session with clear, prepared questions — do not wing it.

Why this matters: If you go into a discovery session unprepared, you will miss critical information. A question you forget to ask today means a configuration mistake in Phase 2.

For each module, create a template document or spreadsheet with these sections:

- Module Name & Department
- Participants (from Greenwood side — who is in the room)
- Current Process Description — how they do it today (fill during the session)
- Proposed Odoo Flow — how it will work in Odoo (fill after the session)
- Gap Analysis — where the current process differs from standard Odoo
- Open Questions / To Confirm — anything you need to follow up on
- Sign-off box — to be signed by Greenwood contact after review

The 13 modules you need templates for:

- **Employees | Attendance | Time Off | Payroll | Expenses | Appraisal (HR group)**
- **Purchase | Inventory | Sales (Operations group)**
- **Accounting | Assets | Project | Document (Finance & Management group)**

Step 3 — Send Master Data Templates to Greenwood

One of the most important things you do today is send Greenwood their master data templates. This data is needed before Phase 2 configuration begins. Send it NOW so they have maximum time to fill it in.

Templates to prepare and send:

- Products Template — product name, category, unit of measure, price, expiry tracking (yes/no), stock type
- Customers Template — customer name, type (hospitality/maritime/oil & gas/corporate), contact details, payment terms, credit limit
- Suppliers/Vendors Template — supplier name, contact, payment terms, product categories they supply
- Employees Template — employee name, job title, department, contract type, start date, salary (or salary range)
- Chart of Accounts Template — account name, account type, account code (or ask if they have an existing structure to migrate)
- Fixed Assets Template — asset name, category, purchase date, purchase cost, current book value, depreciation method

In your email to Greenwood, clearly state:

- What each template is for
- Deadline: Wednesday 11 March (start of Week 2) — this is non-negotiable as Phase 2 depends on it
- Who to send it back to
- A contact they can call if they have questions about what to fill in

Critical: If master data is late, Phase 2 gets delayed. Set a reminder to follow up on Monday 9 March if nothing has come back yet.

Step 4 — Share the BPM Activity Plan with Greenwood

Send Greenwood the BPM Activity Plan document (the one prepared alongside this guide). This tells them what departments are needed each day of the BPM sessions.

In your message to Greenwood, include:

- The BPM Activity Plan document as an attachment
- A brief explanation: 'This schedule shows which departments we will be meeting with each day. Please ensure the right people are available and free on their respective day.'
- Ask them to confirm receipt and confirm the schedule works, or flag any scheduling conflicts by end of day Tuesday
- Mention that sessions are approximately 2 hours each and no preparation is needed from their team — just their time and knowledge

Step 5 — Draft the Inception Report Shell (Support to Senior)

While your senior leads the Inception Report, you can help by starting the shell document — the outline structure and sections. This is optional but shows initiative and helps move things faster.

- Create a new document titled 'Greenwood Supply Services — Inception Report — Draft'
- Add sections: Cover Page, Project Overview, Scope (all 13 modules), Team Contacts, Timeline Table, BPM Section (to be filled later), Master Data Requirements, Change Request Process
- Share it with your senior for them to lead and fill out

Tuesday End-of-Day Checklist

✓	Phase 1 Gate — Checklist Item
☐	Sprint board created and all Week 1 tasks assigned
☐	BPM discovery templates prepared for all 13 modules
☐	Master data templates sent to Greenwood with Wednesday 11 March deadline clearly stated
☐	BPM Activity Plan sent to Greenwood — schedule confirmed or conflicts flagged
☐	Inception Report shell shared with senior
☐	Team briefed on Wednesday and Thursday session plans

Today's Goal: Run discovery sessions for Inventory & Warehouse, Purchase, and Sales. Document every single flow, ask every question on your sheet, and note every gap. Leave nothing to memory.

Start the day with your 9:30 AM standup. Confirm room bookings, who is attending from Greenwood's side for each session, and that all team members have their question sheets ready.

HOW TO RUN A BPM DISCOVERY SESSION

Before diving into each module, understand how a discovery session works. This is your standard approach for every single session this week.

7. Introduce yourself and explain the purpose: 'We are here to understand how you currently do things. There are no right or wrong answers — we just need to know your real process so we can configure Odoo correctly for you.'
8. Ask open-ended questions — let them talk. Your job is to listen and guide, not to lead them toward an answer.
9. Draw the flow as they talk — use a whiteboard, paper, or a process diagram tool. Show the boxes and arrows: who does what, in what order, and who approves what.
10. Ask follow-up questions: 'What happens if X is rejected? What if the person who normally does this is on leave? What happens at month-end?'
11. Note every system they currently use — spreadsheets, paper forms, WhatsApp, email, another software. All of this is part of the current-state picture.
12. Confirm your understanding by reading it back: 'So just to confirm — the process is [X], then [Y] goes to [Z] for approval, and if approved [A] happens. Is that right?'
13. Note every gap — anywhere their current process does not fit standard Odoo neatly. These gaps need a decision: adapt the process, use a workaround, or raise a Change Request.
14. After the session, fill in the BPM template immediately while it is fresh. Do not leave it for later.

SESSION 1 — INVENTORY & WAREHOUSE

Who to invite from Greenwood: Warehouse Manager, Store Keeper, whoever handles receiving, stock management, and dispatch

Module 1A: Inventory — Discovery Questions

Topic / Area	Questions to Ask / Points to Cover
Warehouses & Locations	• How many physical warehouse/storage locations does Greenwood have? • What are they called and where are they located? (Ghana, Namibia, both?) • Are there sections within a warehouse — e.g. cold storage, dry goods, bulk area? • Do you track stock at the individual bin/shelf level or just warehouse level?
Products & Categories	• What categories of products do you carry? (fresh produce, packaged goods, beverages, dry goods, cleaning supplies?) • How many products approximately?

Topic / Area	Questions to Ask / Points to Cover
	• How are products currently identified — do you use product codes or just names? • What units of measure do you use? (kg, litres, cartons, pieces, etc.) • Are there any products with multiple units of measure? (e.g. buy in kg, sell in portions?)
Expiry & Freshness Tracking	• Which products have expiry dates? • How do you currently track expiry? (written on stock card? system? visual inspection?) • Do you use FIFO (First In First Out) — oldest stock sold first? • Or FEFO (First Expired First Out) — earliest expiry sold first? • Who is responsible for flagging and removing expired stock? • What happens to expired or near-expired stock?
Stock Receiving	• Walk me through exactly what happens when a delivery arrives at your warehouse. • Who checks the delivery? What do they check against? (PO? delivery note?) • What documents are created at receiving? • If there is a discrepancy (wrong quantity, damaged goods) — what happens? • Is there a quarantine/quality hold area?
Stock Movements & Transfers	• How does stock move between locations? (if multiple warehouses) • Is there a formal internal transfer document or is it informal? • Who approves internal transfers? • How are returns from customers handled? • How are returns to suppliers handled?
Replenishment	• How do you know when to order more stock? • Is there a minimum stock level set for any products? • Who decides when and how much to reorder? • Is replenishment triggered automatically or manually?
Stock Counts & Audits	• How often do you do a full stock count? • Do you do any cycle counts (partial counts more frequently)? • How is the count reconciled? What if the count doesn't match the system? • Who is present and responsible during a stock count?
Dispatch & Delivery	• How is a customer order picked and packed? • Who generates the delivery note / waybill? • What information must be on the delivery note? • How is the delivery confirmed as received by the customer? • What reports does the warehouse team need? (stock on hand, stock movement, expiry report?)

SESSION 2 — PURCHASE

Who to invite from Greenwood: Procurement Manager, anyone who raises purchase orders or deals with vendors

Module 2: Purchase — Discovery Questions

Topic / Area	Questions to Ask / Points to Cover
Purchase Request Process	• How is a need to buy something identified and communicated? • Is there a formal Purchase Request form, or is it done verbally / by email / WhatsApp? • Who can raise a purchase request? Any department or only specific people? • Does the request need internal approval before going to a vendor?
Vendor Management	• How many regular vendors do you use? • Are vendors categorised? (e.g. fresh produce suppliers, packaging, general goods?) • Do you have preferred vendors for certain product categories? • Do you have vendor contracts or are purchases ad-hoc? • What information do you track per vendor? (contact, payment terms, bank details?)
RFQ / Quotation Process	• When you need something, do you get quotes from multiple vendors or go straight to one? • How many quotes do you typically get for a purchase? • How are quotes received? (email? phone call? formal tender?) • Who decides which vendor to use after quotes are received? • Is there a minimum amount that requires multiple quotes?
Purchase Order Approvals	• Who is authorised to approve a purchase order? • Are there approval levels based on the PO value? (e.g. up to GHS 1,000 — supervisor; above — manager?) • What are the actual approval thresholds if any? • Can a PO be raised without approval if it's urgent? • How is the vendor notified of the approved PO?
Goods Receipt	• When stock arrives, how is the PO matched to the delivery? • Who confirms that what was ordered matches what arrived? • What happens if there is a short delivery or damaged goods? • Is a formal Goods Receipt Note (GRN) created? • How is the receipt recorded currently?
Vendor Bills & Payment	• How does a vendor invoice reach your accounts team? • Is the vendor bill matched against the PO and GRN before payment? • Who approves payment of a vendor bill? • What are the typical payment terms with vendors? • How are payments made? (bank transfer? cheque? cash?) • Do you pay in local currency only or also USD / other currencies?

SESSION 3 — SALES

Who to invite from Greenwood: Sales Manager, Customer Service Lead, anyone who handles orders, pricing and invoicing

Module 3: Sales — Discovery Questions

Topic / Area	Questions to Ask / Points to Cover
Customer Types & Classification	• What types of customers does Greenwood serve? (hospitality hotels, maritime, oil & gas, corporate?) • Are customers in both Ghana and Namibia? • Do different customer types get different pricing or terms? • How are new customers onboarded? Is there a credit check or approval process? • What information is tracked per customer? (contact, credit limit, payment terms, delivery address?)
Quotation & Order Process	• How does a sale start? Does the customer send a written request, call, email, or WhatsApp? • Who creates the quotation? • What is on the quotation? (product list, quantities, prices, delivery date?) • How is the quotation sent to the customer? • How does the customer confirm they want to proceed? (written PO? email? verbal?) • How is the confirmed order recorded in your current system?
Pricing & Discounts	• Do you have fixed price lists or is pricing negotiated per order? • Do different customers get different prices for the same product? • Are there volume discounts — buy more, pay less per unit? • Are there seasonal price changes? • Who is authorised to apply a discount? • Is there a maximum discount percentage allowed?
Delivery Management	• Who handles logistics and delivery? • How is a delivery scheduled after an order is confirmed? • Does Greenwood use its own vehicles or 3rd party delivery? • How is the delivery note created and who gets a copy? • How do you confirm the customer received the goods? • What happens if goods are rejected or returned by the customer?
Invoicing & Payment	• When is the customer invoiced? On order confirmation or on delivery? • Does a single order always result in a single invoice or can it be split? • What are typical payment terms given to customers? • How are outstanding invoices tracked? • Who follows up on overdue payments? • How are customer payments received and recorded? (bank transfer, mobile money, cash?)
Sales Reporting	• What sales reports are currently needed? • Does management review sales performance weekly? Monthly? • Is there a target/budget to track against? • Are there any reports needed per customer, per product, or per sales rep?

Wednesday End-of-Day Actions

- Immediately after each session — write up the BPM template while details are fresh
- Note all open questions and gaps identified in each session
- Send a brief WhatsApp/email to Greenwood contacts: 'Thank you for your time today — we will follow up if we have any clarifications'
- Brief your senior on progress and any major gaps found
- Update the sprint board — mark discovery sessions as complete
- Prepare any additional questions for Thursday's sessions based on what you learned today

THURSDAY

5 March 2026

BPM Discovery — Accounting | HR | Expenses | Appraisal | Assets | Project | Document

Today's Goal: This is the biggest discovery day — you are covering Accounting, the full HR group, Expenses, Appraisal, Assets, Project, and Document Management. Stay focused, time-box each session, and document thoroughly.

Start with your 9:30 AM standup. Thursday also has a mid-sprint check-in at 3:00 PM — use this to review progress, identify any gaps from today's sessions, and confirm what still needs to be finalised for Friday.

SESSION 4 — ACCOUNTING

Who to invite from Greenwood: Finance Manager, Chief Accountant, whoever handles bookkeeping, invoicing, payments, and financial reporting

Module 4: Accounting — Discovery Questions

Topic / Area	Questions to Ask / Points to Cover
Chart of Accounts	- Do you have an existing chart of accounts? Can you share a copy? - What accounting software are you currently using? (Excel, QuickBooks, Sage, Tally?) - Do you use a standard chart of accounts (IFRS?) or a custom one? - Are there specific account codes you must keep for regulatory/tax compliance? - Do you want to migrate the existing CoA into Odoo or start fresh?
Company Structure	- Is Greenwood one legal entity or are Ghana and Namibia separate entities? - Do you need multi-currency support? (GHS, NAD, USD?) - If multi-entity — do you need consolidated financial reporting across both? - What is the fiscal/financial year? (January–December or another period?)
Journals & Bank Accounts	- What bank accounts does Greenwood hold? (list each bank, currency, account type) - How many journals are needed? (Sales, Purchase, Bank, Cash, General?) - Do you have petty cash accounts? - How many cashiers or people handle cash payments?
Tax Configuration	- Are you VAT registered in Ghana? What is the applicable rate? (standard VAT 15%?) - Are there any tax exemptions for certain customers or products? - Do you have tax obligations in Namibia as well? - What tax reports are required for submission to Ghana Revenue Authority (GRA) or Namibia? - Are there any withholding tax requirements?
Customer Invoices & Payments	How are customer invoices currently generated and sent?

Topic / Area	Questions to Ask / Points to Cover
	- What payment methods do customers use? (bank transfer, mobile money, cash, cheque?) - How is a payment matched to an invoice? - How are credit notes handled? - How are customer refunds processed?
Vendor Bills & Payments	- How are vendor invoices received and processed? - Is there a three-way match (PO + GRN + Invoice) before payment? - Who authorises vendor payments? - What payment methods are used to pay vendors? - How are vendor advances handled?
Bank Reconciliation	- How often is bank reconciliation done? (daily, weekly, monthly?) - Does someone receive bank statements directly or is it done manually? - Who is responsible for bank reconciliation?
Financial Reporting	- What financial reports are required? (Profit & Loss, Balance Sheet, Cash Flow?) - How often are reports reviewed? (monthly, quarterly?) - Does management need a dashboard with key financial KPIs? - Are there reports required for external stakeholders (board, auditors, investors?)?

SESSION 5 — HR MODULES

Who to invite from Greenwood: HR Manager, HR Officer, Payroll Administrator — have them all available for this session

Module 5A: Employees — Discovery Questions

Topic / Area	Questions to Ask / Points to Cover
Organisation Structure	- How many employees does Greenwood currently have (Ghana + Namibia combined)? - What departments exist? Can you draw the org chart? - Who does each department report to? - What job positions/titles are used?
Employee Records	- What information is recorded per employee? (ID number, date of birth, address, emergency contact, qualifications?) - What contract types are used? (permanent, fixed-term, probation, part-time, contractor?) - How is probation managed? Who confirms an employee has passed probation? - Are employee documents stored somewhere? (contracts, ID copies, certificates?)
HR Administration	- Who manages HR — dedicated HR department or one person? - Who can view sensitive employee information (salaries, personal details)?

Topic / Area	Questions to Ask / Points to Cover
	When an employee leaves — what is the process? (notice period, final pay, exit interview?)

Module 5B: Attendance — Discovery Questions

Topic / Area	Questions to Ask / Points to Cover
Current Attendance Tracking	- How do employees currently clock in and out? (paper register, biometric machine, app, nothing?) - Is there a biometric/fingerprint device at the office/warehouse? - Are there multiple locations that need separate attendance tracking?
Shifts & Schedules	- Does Greenwood have shift workers or is it standard business hours? - What are the standard working hours? (8am–5pm? 7am–4pm?) - Are there different shift patterns? (morning shift, night shift?) - How is overtime tracked? Is it pre-approved or claimed after? - How are public holidays handled in attendance?
Attendance Reporting	- What attendance reports are currently reviewed? - Who reviews attendance? (HR? Managers?) - How is absenteeism currently managed?

Module 5C: Time Off (Leave) — Discovery Questions

Topic / Area	Questions to Ask / Points to Cover
Leave Types	- What types of leave are offered? List ALL of them (annual, sick, maternity, paternity, compassionate, study leave, unpaid, etc.) - How many days are employees entitled to per leave type per year? - Is this the same for all employees or does it differ by role or service years? - Are there any leave types that require medical certificates or other documentation?
Leave Request & Approval	- How does an employee currently request leave? (form, email, WhatsApp, verbally?) - Who approves leave? Is it the direct manager? HR? Both? - Is there a two-step approval? (manager first, then HR?) - How far in advance must leave be requested? - Is there a minimum/maximum leave duration per request?
Leave Allocation & Balances	- Are leave days allocated at the start of the year or accrued monthly? - Can unused leave be carried over to the next year? How many days maximum? - What happens to unused leave when an employee resigns or is terminated — is it paid out?
Specific Scenarios	- If a public holiday falls within a leave period — is it counted as a leave day or not? - Are there any blackout periods where leave is not allowed? (e.g. month-end?)

Topic / Area	Questions to Ask / Points to Cover
	How is emergency leave handled?

Module 5D: Payroll — Discovery Questions

Topic / Area	Questions to Ask / Points to Cover
Pay Cycle & Structure	- When is payroll run? (end of month? 25th of every month?) - Are all employees on the same pay cycle or are there different cycles? - What is the basic salary structure? Is it just basic pay or are there salary bands?
Allowances	- What allowances do employees receive? List ALL allowances: housing, transport, medical, meal, communication, field/site allowances? - Is every employee entitled to the same allowances or does it differ by grade/role? - Are any allowances paid in cash or are they all via payroll?
Deductions	- What deductions are applied? (income tax PAYE, SSNIT/pension, health insurance, cooperative deductions, loans?) - For Ghana: is SSNIT at 13% (employer) + 5.5% (employee)? - Is income tax calculated on a graduated scale per GRA? - Are there any employee loans that are deducted monthly from salary?
Payroll Process	- Who runs payroll? Just one person or a team? - Who reviews and approves payroll before it is paid? - How are payslips currently distributed? (printed, emailed?) - How are salaries paid? (bank transfer to all? Some in cash?) - Are payroll journal entries posted to accounting currently?

Module 5E: Expenses — Discovery Questions

Topic / Area	Questions to Ask / Points to Cover
Expense Types	- What types of expenses do employees claim? (travel, accommodation, meals, fuel, phone, office supplies?) - Are there spending limits per expense type? - Are there any company credit cards used?
Expense Claim Process	- How does an employee currently submit an expense claim? (paper form, email, nothing formal?) - What documentation is required? (receipts? only above a certain amount?) - Who reviews and approves expense claims? (line manager? finance?) - Is there a deadline for submitting expenses? (e.g. must be submitted within 30 days?)
Reimbursement	- How are expenses reimbursed? (through payroll? separate bank transfer? cash?) - How long does it take for an employee to be reimbursed after submission?

Topic / Area	Questions to Ask / Points to Cover
	Are expenses posted as a cost in accounting? Which accounts?

Module 5F: Appraisal — Discovery Questions

Topic / Area	Questions to Ask / Points to Cover
Appraisal Frequency & Structure	- How often are appraisals conducted? (annual, semi-annual, quarterly, after probation?) - Is it the same cycle for all employees? - What is being appraised? (target achievement? competency? behaviour? all three?)
Appraisal Process	- Who initiates the appraisal? (HR? the manager? automatically triggered?) - Is there a self-assessment before the manager assessment? - Is there a 360-degree review involving peers or direct reports? - Who signs off the final appraisal?
Goals & Outcomes	- Are employee goals/KPIs set at the start of the year? - Are appraisal results linked to salary increases or bonuses? - Are appraisal results used for promotion decisions? - Are training needs identified through appraisals?

SESSION 6 — ASSETS, PROJECT & DOCUMENT

Module 6A: Assets — Discovery Questions

Topic / Area	Questions to Ask / Points to Cover
Asset Register	- What types of fixed assets does Greenwood own? (vehicles, equipment, computers, furniture, cold storage units, generators?) - Is there a current fixed asset register? Can you share it? - How are assets currently tracked? (spreadsheet? nothing formal?)
Asset Categories & Depreciation	- What depreciation method is used? (straight-line? declining balance?) - What are the depreciation rates or useful lives per asset category? - Are the depreciation rules set by an auditor or internally? - Are depreciation entries posted to accounting currently?
Asset Lifecycle	- How is the purchase of a new asset recorded? - How are asset disposals or write-offs handled? - Are there any assets currently under lease or hire purchase? - Are assets ever partially depreciated (e.g. asset revalued)?

Module 6B: Project — Discovery Questions

Topic / Area	Questions to Ask / Points to Cover
Project Types	Does Greenwood manage any projects formally? (client catering projects, procurement projects, facility setup?)

Topic / Area	Questions to Ask / Points to Cover
	• Are these internal operational projects or client-facing projects? • How are project tasks currently assigned and tracked? (WhatsApp? email? spreadsheet?)
Project Structure	• What information is tracked per project? (budget? timeline? resources?) • Are timesheets tracked against projects currently? • What reports are needed? (project status, budget vs actual, task completion?)

Module 6C: Document Management — Discovery Questions

Topic / Area	Questions to Ask / Points to Cover
Current Document Storage	• Where are important documents currently stored? (email, shared drive, physical files, mixed?) • What are the main types of documents to store? (contracts, purchase orders, invoices, HR documents, compliance certificates?)
Access & Organisation	• Who needs access to which document types? • Should some documents be restricted? (e.g. salary contracts visible only to HR?) • What folder/category structure makes sense for Greenwood? • Are there any retention requirements? (documents must be kept for 7 years, etc.?)

Thursday 3:00 PM — Mid-Sprint Check-In

At 3:00 PM run the mid-sprint check-in with your full team.

- Review every session from Wednesday and Thursday — what was captured, what is still unclear?
- List all open questions that need follow-up with Greenwood before Friday finalisation
- Schedule a short clarification call with Greenwood for late Thursday or first thing Friday morning to resolve all open items
- Identify any gaps found that could affect Odoo configuration — flag these to senior immediately
- Assign Friday's documentation tasks — who finalises which module's BPM write-up

Thursday End-of-Day Actions

- All session notes typed up — not just jotted notes, full flowing write-up
- Open questions list compiled and sent to Greenwood contact for quick clarification
- Any major gaps escalated to senior
- Sprint board updated — all Thursday sessions marked
- Tomorrow's finalisation work divided among team

Today's Goal: Finalise all BPM documentation to a professional standard, present to Greenwood, address any feedback, and obtain formal written sign-off. This closes Phase 1 and unlocks Phase 2.

Step 1 — Resolve All Open Questions (9:00–10:00 AM)

First thing Friday morning, if there are any outstanding questions from Thursday's sessions, resolve them with Greenwood immediately — by call or WhatsApp. Every open question on your list must be closed before the documentation is finalised.

- Call or message the relevant Greenwood contact for each open question
- Document the answer in the relevant module's BPM template
- If a question cannot be answered today — document it clearly as an assumption with a note: 'To be confirmed with Greenwood — assumed as [X]'

Step 2 — Finalise All 13 BPM Documents

This is the main work of Friday morning. Every module must have a complete, clean, professional BPM document ready for client review.

For EACH module, ensure the BPM document includes:

15. Module Name, Department & Date of Discovery Session
16. Participants (who was in the room from Greenwood)
17. Current State Process — a clear, step-by-step description of how Greenwood does this today
18. Proposed Odoo Workflow — how this process will work inside Odoo after configuration
19. Process Flow Diagram — a simple flowchart showing the steps, who does each step, and where approvals happen (even a simple hand-drawn and scanned diagram is fine at this stage)
20. Gap Analysis — list every place where the current process differs from standard Odoo, and how the gap will be resolved
21. Data Requirements — what data is needed for configuration (e.g. list of leave types, approval levels, salary components)
22. Open Items / Assumptions — anything still to be confirmed

Specific things to capture per module group:

- **HR modules:** document exact leave types and entitlements, exact salary structure breakdown, all approval workflows, all allowance and deduction types
- **Purchase:** document all approval thresholds and levels exactly
- **Sales:** document all pricelist rules and discount structures exactly
- **Accounting:** document the full chart of accounts structure and all tax rules
- **Inventory:** document all warehouse locations, all product categories, expiry rules, and replenishment triggers

Step 3 — Internal BPM Review (10:00–11:00 AM)

Before sharing with Greenwood, the full iSERD team reviews all 13 BPM documents together.

- Is every module covered completely — no blanks?
- Are all flows logical and consistent? (e.g. does the Sales invoicing flow match what Accounting described?)

- Are there any cross-module dependencies noted? (e.g. Payroll journal entries going to Accounting — both need to be aligned)
- Are all gaps clearly identified and proposed resolutions documented?
- Would a developer reading this have everything they need to configure the module?

Rule: If you cannot answer YES to the last question above for a module — it is not ready to share. Fix it first.

Step 4 — Share BPM Draft with Greenwood (11:00 AM–1:00 PM)

Send the completed BPM document to Greenwood for their review. This can be done by sharing the document via email or a shared folder.

- Cover email: 'Please find attached our Business Process Mapping document covering all 13 modules. This documents our understanding of your current processes and how they will be configured in Odoo. Please review and let us know if anything is missing or incorrect.'
- Offer a brief review call — 30 minutes is enough — to walk them through the highlights and answer questions
- If a review call is possible today, schedule it for 2:00 PM alongside your Sprint Review

Step 5 — Sprint Review (2:00 PM)

Run the Sprint Review. Present the completed BPM documentation to both your internal iSERD team and the Greenwood stakeholders.

- Walk through the key highlights of each module — you do not need to read every line, just show the structure and confirm the main flows are correct
- Highlight any significant gaps identified and how you propose to resolve them
- Show the master data templates that were sent and reconfirm the deadline: Wednesday 11 March
- Address any questions or corrections from Greenwood on the spot

Step 6 — Obtain Formal Sign-Off

This is the most important step of the entire phase. Without sign-off, Phase 2 cannot begin.

- After the review, incorporate any final feedback quickly
- Send the final BPM document to the Greenwood sign-off authority — this should be a manager or decision-maker, not just the user who was in the session
- The sign-off can be a reply email stating 'We have reviewed and approve the BPM document', or a signature on the document itself
- Do not proceed to Phase 2 configuration until this sign-off is received in writing

If sign-off cannot happen today: Agree on a latest sign-off deadline — Monday morning 9 March is the absolute latest. Flag to senior if there is risk of delay.

Step 7 — Sprint Retrospective (4:00 PM)

Hold the team retrospective to close out the sprint.

- What went well this week?
- What slowed us down or was harder than expected?
- What one thing do we do differently in Week 2?
- Brief the team on Week 2 (Phase 2) — what is the plan, what is expected

Step 8 — Weekly Client Update Email (End of Day)

Before close of business, send Greenwood a written summary of the week. This is mandatory.

- Subject: 'Week 1 — Phase 1 Discovery Complete — Status Update'

- Briefly summarise: all 13 BPM sessions completed, BPM document shared, master data templates sent (deadline Wed 11 March)
- Next steps: Phase 2 configuration begins Monday 9 March — pending sign-off on BPM
- Any actions required from Greenwood: sign-off on BPM, return of master data templates by deadline

PHASE 1 — STATUS GATE 1

Before Phase 2 can begin, every single item below must be confirmed as complete. Do not begin any configuration in Odoo until all boxes are checked.

✓	Phase 1 Gate — Checklist Item
☐	BPM Activity Plan shared with Greenwood and schedule confirmed
☐	Discovery sessions completed for ALL 13 modules — Employees, Attendance, Time Off, Payroll, Expenses, Appraisal, Purchase, Inventory, Sales, Accounting, Assets, Project, Document
☐	All 13 module BPM documents written up, reviewed internally, and finalised
☐	Process flow diagrams included for all modules
☐	Gap analysis completed and documented for all modules
☐	BPM document shared with Greenwood for review
☐	All Greenwood feedback incorporated into final BPM document
☐	Formal written sign-off received from Greenwood on BPM document
☐	Master data templates sent to Greenwood — all 6 templates (Products, Customers, Suppliers, Employees, Chart of Accounts, Assets)
☐	Master data deadline confirmed with Greenwood: Wednesday 11 March
☐	Change Request Register created and shared with both teams
☐	Project Contact Directory confirmed — iSERD team + Greenwood point-of-contact per module
☐	Sprint board closed — all Phase 1 tasks marked Done
☐	Weekly client update email sent before end of day Friday
☐	Sprint retrospective completed and Phase 2 briefing done

GATE CLEARED? When ALL boxes above are ticked and BPM sign-off is received, Phase 1 is complete and Phase 2 Realisation can begin on Monday 9 March 2026.

APPENDIX — QUICK REFERENCE
